Art Unit: 2142

1. Claims 1-26 are presented for examination.

2. Claims 1-26 are allowable over the art of record since the art of record does not teach or remotely suggest selecting a layer in a network protocol stack to establish communications over the network using an inner layer application programming interface (IL API) as currently claimed.

3. This application is in condition for allowance except for the following formal matters of correcting the application. Specifically the reference numerals in the figures are not consistent with the textual portions of the application such as no reference numeral 300, as mentioned on page 4 (line 18), can be found in the figures. For this reason alone, the figures and the specification stand objected to. Also there is no reference numeral 38 in figure 3 as called for by page 4 (line 25). These are just two examples of numerous such like errors throughout the textual and figured portions of the specification. Other such errors are also required to be correct. Also claim and specification terminology are not consistent with figure terminology such as "Application Programming Interface" of the claims and page 2 (lines 27-28) and "Application Protocol Interface" of figure 3 (312). The applicant should use the time to respond to carefully review the whole of the application for other such errors and others the applicant might notice (i.e., typographical errors, spelling errors, and the like).

4. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.
